2018-SVQ-R1-FGIV-010133

FGIV - Architect

As the science and knowledge service of the Commission, the mission of DG Joint Research Centre is to support EU policies with independent evidence throughout the whole policy cycle. The JRC is located in 5 Member States (Belgium, Germany, Italy, the Netherlands and Spain). Further information is available at: https://ec.europa.eu/jrc/en

The Unit Resource Management Seville (R1) is responsible for the management of support functions and the infrastructure at the Seville site.

The JRC Seville plans to develop a new purpose built office building and facilities in Seville. In order to support the JRC in the project definition and design, as well as during the subsequent phases of development of the project (i.e. detailed design and construction phases), the JRC intends to recruit an Architect to join the JRC project team responsible for the development of the building. Reporting to the Project Leader, the Architect will provide expert technical assistance in the definition of the architectural requirements and will monitor their implementation along the process of their realisation

Qualifications:

- Academic and professional qualification as a licensed or chartered architect
- Track record of execution of projects of a comparable size in building design and construction from coordination to execution.
 Evidence of involvement in the successful completion of environmentally improved buildings is an advantage
- Involvement in the financial appraisal of the cost and benefit of environmental technologies and design innovations as part of the delivery of projects is an advantage
- Experience with Building Information Modelling (BIM) is considered an advantage
- Experience with building environmental performance certification schemes (LEED, BREEAM, DGNB, VERDE), and other relevant performance modelling tools is considered and advantage
- Advanced knowledge of modern architectural methods and a background in solving architectural design and construction problems
- Knowledge of urban planning and building construction codes, building contracts, and related Spanish legislation. Knowledge of specific Andalusian and Seville regulations and administrative procedures is considered an
