

2019-IPR-C4-FGIV-011769

**FG IV - Technical and Scientific Project Officer
- Techno-economic analysis of future road
transport policies**

Position for:

FG IV – Project Officer

As the science and knowledge service of the Commission, the mission of DG Joint Research Centre is to support EU policies with independent evidence throughout the whole policy cycle.

The JRC is located in 5 Member States (Belgium, Germany, Italy, the Netherlands and Spain). Further information is available at: <https://ec.europa.eu/jrc/>

Located in Ispra (Italy), the Sustainable Transport Unit is part of the Directorate for Energy, Transport and Climate. The Sustainable Transport Unit, comprising more than 50 staff, provides scientific and technical support on clean and efficient fuels and vehicles for sustainable mobility.

The Unit is also carrying out research activities to address the techno-economic implications of disruptions in the road transport sector. In particular the work supports the development of policy initiatives to mitigate CO₂ emissions from road transport. A multidisciplinary team is established to analyse the available technological solutions and to assess several scenarios for their deployment from an economic, social and environmental point of view.

The present Contract Agent position will be part of this team and will work on the techno-economic assessment of the different scenarios. The work will be carried out in close collaboration with colleagues within the Directorate and other Directorates of the JRC. The preparation of reports and scientific publications are an integral part of the required tasks. It also involves contacts within and outside the Commission. This position offers a number of varied and interesting tasks in a friendly and well-integrated Unit to a motivated, flexible and reliable colleague.

The successful candidate will be in charge of:

- Techno-economic assessment and evaluation of developing and existing policy to reduce transport CO₂ emissions
- Development of computer models and ad-hoc analysis tools
- Data collection, analysis, drafting of reports and scientific publications

Qualifications:

We look for a person with strong interest and understanding of transport issues, who will have a good aptitude of taking initiative, developing new concepts and being a strong team player.

In particular the candidate shall have completed university studies of at least three years attested by a diploma and at least five years professional experience in a field relevant to the position, or alternatively a doctoral diploma in Economics, Engineering or related fields.

	<p>In addition, the following qualifications are considered as an asset:</p> <ul style="list-style-type: none"> • Knowledge/experience in transport economics or transport engineering; • Knowledge of software tools and programming languages for data collection, handling, and analysis; • Solid record of research activities relevant for the post including publications in international peer-reviewed journals; • Very good oral and written communication skills in English (B2) are essential, knowledge of other languages; • Ability to work in a team and in a multi-cultural environment; <p>The candidate is expected to be creative and work independently.</p>
Directorate Unit	<p>Energy, Transport and Climate Sustainable Transport</p> <p>Further information: https://ec.europa.eu/jrc/</p>
