The Joint Research Centre of the European Commission in Seville (Spain) is looking for an Economic Modeller in the field of Agriculture and Food Security to join its Unit "Economics of Agriculture".

The Joint Research Centre (JRC) is the European Commission's in-house science service. Its mission is to provide EU policies with independent, evidence-based, scientific and technical support throughout the whole policy cycle. Working in close cooperation with policy Directorates-General, the JRC addresses key societal challenges while stimulating innovation through developing new methods, tools and standards, and sharing its know-how with the Member States, the scientific community and international partners. Further information is available at: [https://ec.europa.eu/jrc/en](https://ec.europa.eu/jrc/en)

Unit JRC.D.4 "Economics of Agriculture" focuses on the analysis of agricultural and trade policies in the EU and third countries. The successful candidate will contribute to ex-ante analysis of agriculture and food security related policies in African countries based on economic modelling tools. Current analysis are based on Computable General Equilibrium (CGE) and farm-level models. He/she will contribute to development and maintenance of possible linkages between the two economic modelling tools. The job consist of development and maintenance of model code, data analysis, econometric estimation. He/she will perform scenario analysis with the selected tools and contribute to the preparation and presentation of reports, summaries of results for policy makers and academic papers.

The job involves cooperation with policy services including EU Delegations, and local public officers and researches of involved countries.

The unit proposes a position of a researcher to contribute to the Integrated policy analysis of African countries.

Main tasks will be to:

- further develop and improve the integration between mentioned models, including writing programming code, data analysis, econometric estimation;
- contribute to the maintenance of the suite of models hosted in the unit to analyse African economies;
- conduct economic analyses, including preparation and presentation of reports, summaries of results for policy makers and academic papers;
- initiate, manage and monitor related research projects; this will include the preparation of technical specifications and validating and evaluating research results and publications; draft reports for policy makers; and
- contribute to the cooperation with policy services and development of the international network of cooperation of JRC.
