As the science and knowledge service of the Commission, the mission of DG Joint Research Centre is to support EU policies with independent evidence throughout the whole policy cycle.

The JRC is located in 5 Member States (Belgium, Germany, Italy, the Netherlands and Spain). Further information is available at: https://ec.europa.eu/jrc/

The Unit JRC.C.6 "Economics of Climate Change, Energy and Transport" conducts economic analysis of climate, energy and transport policies, both at EU and global levels, using different databases and expertise with in-house economic models and econometric tools.

The ECCET unit offers a position as Energy and Transport Policy Analyst.

The main tasks of this position include:

- **produce quantitative analysis** in support of ex-ante impact assessments and policy initiatives in support of DG CLIMA, DG MOVE and DG ENER in the context of EU Green Deal, with a special focus on transport;

- support the development of methods and tools to enhance the representation of the transport sector in the in-house energy and climate modelling tools (in particular the model POTEnCIA https://ec.europa.eu/jrc/en/potencia);

- support to the maintenance of relevant data input, including the techno-economic characterisation of transport technologies and historical data (e.g. JRC-IDEES https://ec.europa.eu/jrc/en/potencia/jrc-idees);

- **contribute to JRC publications**, such as science for policy reports and policy briefs, along with internal and external communication on these;

- collaborate with other teams on related policy-relevant scientific topics, in the unit, with other JRC and EC units, or with external contractors (for instance linking specialized transport models to overall energy system models);

- participate actively to the international energy and transport research fora; contribution to research projects,
