As the science and knowledge service of the Commission, the DG Joint Research Centre supports EU policies with independent evidence throughout the whole policy cycle. The JRC is located in 5 Member States (Belgium, Germany, Italy, the Netherlands and Spain). Further information is available at: https://ec.europa.eu/jrc/.

The vacancy is within the 'Knowledge for the Energy Union' Unit of Directorate C - Energy, Transport & Climate. The Unit has the mission to support the European Green Deal and the transition to a climate-neutral economy through the mapping and analysis of relevant knowledge and data, the generation of new evidence, the anticipation of evolving trends and their effective communication. Our staff (about 50) is mainly based in Petten (NL).

The successful candidate will:

- Monitor, analyse, compare and synthesise information from key energy scenarios published by research organisations, industrial associations, market analysts and other institutions that address climate neutrality by 2050
- Assess the impact of technological innovation and technology options with respect to the objectives of the Green Deal and Industrial Strategy goals, mainly through analysis of key EU and global energy modelling exercises
- Contribute to maintaining and updating relevant databases; apply new skills in data analysis and approaches in the work stream (e.g. text-mining, visualisation, storytelling)
- Contribute to relevant activities and tasks stemming from cooperation with other Commission Services (e.g. DG ENER, DG GROW) and international stakeholders (e.g. IRENA)

Qualifications:

The ideal candidate should have a completed university degree in Engineering, Economics or Science of at least three years attested by a diploma and at least five years of
professional experience on energy modelling meta-analysis. Alternatively, the candidate should have a PhD degree with research experience in relevant to the job tasks.

S/he should be well versed in energy system and energy system dynamics; experience with some type of modelling is preferred. A good understanding of energy intensive industries would be an advantage.

Very good (B2 level) command of English and writing skills (supported by a publications list), are essential.

Good knowledge of optimisation and statistical analysis (e.g. R), programming and data management skills (e.g. Python) would be an advantage.

We look for a team player, result-driven, able to multi-task, seeking for synergies and extrovert colleague.

The candidate must be on a valid EPSO reserve list for Function Group IV contract staff.

If you are not in any valid EPSO reserve list for Function Group IV contract staff, you can still apply by following these steps.

You express your interest by applying to the CAST Permanent or to the permanent JRC Call for researchers.

1. CAST Permanent: open-ended selection procedure to create a pool of candidates from which the institutions, bodies, offices and agencies of the European Union (EU) can recruit contract agents. [https://epso.europa.eu/documents/2240_en](https://epso.europa.eu/documents/2240_en)

(Only for GFIV – Researchers/Scientific profiles):

Only then you can apply for this specific position, through [http://recruitment.jrc.ec.europa.eu/?type=AX](http://recruitment.jrc.ec.europa.eu/?type=AX)

**Auxiliary contract staff:**

Article 3b of the Conditions of Employment of Other Servants of the European Union applies: the actual period of employment within the Commission under this type of contract, including any period under renewal, shall not exceed 6 years.

Please note that in case a high number of applications is received only shortlisted candidates will be contacted.
