FG IV – S/T project Officer - Integrated techniques for the seismic strengthening and energy efficiency of existing buildings: overview and classification of technologies for seismic strengthening and energy upgrading of existing buildings and on methodologies for assessing the combined upgrading of existing buildings

<p>Position for:</p> <p>FG IV – Scientific/Technical project Officer</p>	<p>As the science and knowledge service of the Commission, the mission of DG Joint Research Centre is to support EU policies with independent evidence throughout the whole policy cycle.</p> <p>The JRC is located in 5 Member States (Belgium, Germany, Italy, the Netherlands and Spain). Further information is available at: https://ec.europa.eu/jrc/</p> <p>The current vacancy is in the Directorate for Space, Security and Migration (located in Ispra, Italy). The Directorate serves the Foreign and Security, Humanitarian Aid and Civil Protection, Human Rights, Justice and Home, and Institutional Affairs policy areas including the perspective of the emerging Digital Single Market.</p> <p>The job we propose is in the Safety and Security of Buildings Unit within a team of experimentalists and numerical modellers who provides reference results relevant to the European standardization in the building and construction sectors.</p> <p>The jobholder will work for the Pilot project '<i>Integrated techniques for the seismic strengthening and energy efficiency of existing buildings</i>' which will identify existing technological options for seismic and energy upgrading as well as the typologies of buildings most needing upgrading. In addition, methodologies for assessing the combined effect of upgrading will be studied, further developed and applied to case studies. The seismic risk and the energy performance of existing buildings will be assessed at regional level throughout Europe to identify those regions where interventions are of higher priority.</p> <p>The main tasks of the job will include:</p> <ul style="list-style-type: none">• Perform reviews and classification of technologies for seismic strengthening and energy upgrading of existing buildings.• Contribute to the definition of methodologies for assessing the combined effect of upgrading.• Perform data analysis and write technical and policy reports.• Write scientific publications.• Collaborate with other experts contributing to the project. <p>In addition to the duties for achieving the scientific elements of the project, the job involves support to project management.</p> <p>Qualifications:</p> <p>The ideal candidate must have a level of education corresponding to completed university studies in civil/structural engineering of at least three (3) years attested by a diploma AND at least five (5) years of</p>
