FG IV - General Equilibrium Modeller - Corporate Taxation

<p>2 Positions for:</p> <p>FGIV - General Equilibrium Modeller - Corporate Taxation</p>	<p>As the science and knowledge service of the Commission, the mission of DG Joint Research Centre is to support EU policies with independent evidence throughout the whole policy cycle.</p> <p>The JRC is located in 5 Member States (Belgium, Germany, Italy, the Netherlands and Spain). Further information is available at: https://ec.europa.eu/jrc/</p> <p>The Fiscal Policy Analysis Unit of JRC-Seville wishes to recruit two economic analysts to work on corporate taxation in order to provide quantitative support to EU tax policy recommendations and proposals. This will be delivered within the support framework to DG TAXUD and DG ECFIN, and involve contexts such as the EU proposals on corporate taxation and the European Semester. Further information is available at: https://ec.europa.eu/jrc/en/research-topic/fiscal-policy-analysis.</p> <p>The successful candidates will be expected to support the analysis of corporate tax reforms using applied general equilibrium modelling. The candidates should either have experience in tax policy, or a strong motivation to learn, with a solid knowledge of computable general equilibrium modelling techniques.</p> <p>Research and analytical work will involve collaboration with other European Commission services and other relevant international organisations and research institutions. The candidates will contribute to the assessment of Commission proposals and Member States reforms in the area of corporate taxation.</p> <p>Qualifications:</p> <p>Candidates should ideally have a PhD (doctoral diploma) or a minimum of 5 years professional experience after university studies of at least 3 years (attested by a diploma). She/he should have a solid background in economics, preferably in the area of tax policy. Knowledge of Stata software is also welcome.</p> <p>The successful candidate will need to have experience in the analysis of corporate taxation, focusing in particular on the use of computable general equilibrium models. A good command of GAMS programming language or a willingness to learn it are required.</p> <p>A track record of research and publications in the field of taxation and/or using large firm-level databases are welcome.</p>
