**Trainee on analysis of data related to 3R
education and training**

Position for:

Trainee

As the science and knowledge service of the European Commission, the mission of Joint Research Centre (JRC) is to support EU policies with independent evidence throughout the whole policy cycle.

The JRC is located in 5 Member States (Belgium, Germany, Italy, the Netherlands and Spain). Further information is available at: <http://www.jrc.ec.europa.eu>

Short description of activity:

The Chemical Safety and Alternative Methods Unit (F.3), which includes The European Union Reference Laboratory for Alternatives to Animal Testing (EURL ECVAM), is part of the JRC's Directorate F for Health, Consumers and Reference Materials.

We develop, evaluate, harmonise and promote innovative methods for the regulatory safety assessment of chemicals. We provide support to a broad range of policy areas including industrial and household chemicals, cosmetics, food, plant protection products, endocrine disrupters and chemical mixtures.

The five-month traineeship position will support a project to analyse and visualise existing and new data related to the availability of Three Rs (replacement, reduction and refinement of animal use in science) information and resources globally, with attention to how alternative methods and approaches are incorporated into education and training at three levels, high school, university and professional.

The main tasks of the trainee will be to organise, review and analyse data provided in an inventory and present conclusions to support new policy decisions in the area. The tasks will be undertaken in collaboration with and under supervision of experienced colleagues.

The work will be entirely desk-based and

	<p>requires a good command of MS Office and database processing skills (Excel or Access).
