AI cybersecurity researcher

Position for: AI cybersecurity researcher

Trainee

As the science and knowledge service of the Commission, the mission of DG Joint Research Centre is to support EU policies with independent evidence throughout the whole policy cycle.

The JRC is located in 5 Member States (Belgium, Germany, Italy, the Netherlands and Spain). Further information is available at: <https://ec.europa.eu/jrc/>

The current vacancy is with the Cyber and Digital Citizens' Security Unit, Space, Security and Migration Directorate, located in Ispra, Italy. The mission of the Unit is to strengthen trust and security of the European Citizen in a sustainable and inclusive ICT-based European society by scientific research on how emerging Information and Communication Technologies will impact on the security and privacy of citizens' daily life. The unit works on risk mitigation, cyber security, cybercrime, data protection, privacy and on the associated legal and regulatory frameworks.

Objective of the stay:

The selected candidate will assist in the unit's project CRAID (Cybersecurity Research on AI and Data Protection). In particular, he/she will support research on AI robustness and the application of AI to cybersecurity controls.

Tasks to be carried out:

The **tasks** to be carried out under supervision of traineeship adviser will include:

- Assist in the compilation and analysis of datasets
- Assist in the performance and robustness evaluation of AI models.
- Contribute to the research on the robustness of AI solutions and novel

	<p>applications of deep learning techniques in cybersecurity applications, including the publication of scientific results.</p> <p><u>Qualifications:</u></p> <p><u>Essential</u></p> <ul style="list-style-type: none"> • A Computer Science, Computer Engineering or similar degree. • Experience programming machine learning applications in Python (using pytorch or tensorflow) • Good command of English (level B2). <p><u>Advantage</u></p> <ul style="list-style-type: none"> • Experience in intrusion detection and/or malware detection applications • A good understanding of the application of deep learning based models in intrusion detection and malware detection applications. <p>For general eligibility requirements, please read the rules governing the traineeship scheme of the JRC: https://ec.europa.eu/jrc/en/working-with-us/jobs/temporary-positions/jrc-trainees</p>
Unit /Directorate	<p>Space, Security and Migration Cyber and Digital Citizens' Security</p> <p>Further information: https://ec.europa.eu/jrc/</p>
