

2016-IPR-I-000-7055

**Experimental economics applied to
policies of the EU**

Position for:

Trainee

Short description of activity:

The Joint Research Centre (JRC) is the European Commission's in-house science service. In 2013, its institute for Health and Consumer Protection established a Public Health Policy Support Unit to address priority activities such as nutrition, behavioural economics, healthcare quality and health information on rare diseases and cancer.

The successful candidate will provide support to a group of behavioural economists at the JRC working on the application of insights from behavioural economics to different policy fields of the European Commission.

The candidate will also have the chance to develop a small research project under supervision of traineeship adviser.

Qualifications:

Essential.

The candidate should:

- ✓ dispose of at least a university degree in behavioural sciences (preferably behavioural economics).
- ✓ should further be proficient in the use of SAR and/or Stata.
- ✓ have a good level of English (level B2).

Advantage.

Ideally the candidate would have experience in running economic lab experiments and online.

For general eligibility requirements, please read the rules governing the traineeship scheme of the JRC:
