**Developing and assessing the European
Flood Awareness System at a high-
resolution**

<p>Position for:</p> <p>Trainee</p>	<p>As the science and knowledge service of the Commission, the mission of Joint Research Centre is to support EU policies with independent evidence throughout the whole policy cycle.</p> <p>The JRC is located in 5 Member States (Belgium, Germany, Italy, the Netherlands and Spain). Further information is available at: http://www.jrc.ec.europa.eu</p> <p>Short description of activity: The Copernicus Emergency Management Service (Copernicus EMS) is part of the Copernicus Programme, which is an EU Programme managed by the European Commission.</p> <p>The Copernicus EMS supports among others crisis managers, civil protection and hydro-meteorological authorities with warnings, risk and impact assessments as well as ad-hoc geospatial analysis before, during and after natural disasters and man-made crisis. We are looking for a trainee to contribute to the improvement of the European Flood Awareness System (EFAS), which is part of the early warning component of the Copernicus EMS.</p> <p>The trainee's primary duties involve supporting the development and application of LISFLOOD (EFAS's underlying hydrological model) for modelling high resolution discharges at a daily/sub-daily time step at European scale.</p> <p>The trainee would contribute to this effort by collecting all the required data sets at high-resolution and by running the model on a number of test catchments, including an evaluation of the model performance. The trainee should further contribute to the reporting of the performed activities in internal reports and peer reviewed journal publications.</p>
