Job impacts of mobility disruption scenarios

Position for:

Trainee

As the science and knowledge service of the Commission, the mission of Joint Research Centre is to support EU policies with independent evidence throughout the whole policy cycle.

The JRC is located in 5 Member States (Belgium, Germany, Italy, the Netherlands and Spain). Further information is available at: <http://www.jrc.ec.europa.eu>

Short description of activity:

The Unit, amongst others studies possible impacts of mobility disruption scenarios, for example thorough deployment of electromobility, self-driving vehicles or car sharing.

The trainee is asked to give support for a study on job impacts of these possible developments. She/he will derive job factors on the basis Eurostat data for different economic activities and develop a related scenario calculation model. The trainee will then collaborate to run simulations, analyse and document the results. She/he will help a small research team and under the supervision of expert members of our Unit.

At the end of the traineeship, the trainee will have gained significant knowledge with hands-on experience on how model-based support to European energy/transport policy is conducted in practice.

Qualifications:

Essential:

- University degree (as stipulated in the Rules governing the Traineeship Scheme) in the fields of science, economics, or engineering.
- Good knowledge of spoken and written English (level B2).
